

Tesco Superstore, Consett (2012 - 2013)

Scope of Works

Having completed the reclamation of part of the former Consett Steelworks site on behalf of Mansell Construction, Absolute Civil Engineering won the contract to complete the groundworks and external works which included the substructure, drainage, services, car parks, feature walls and landscaping packages.

Work commenced in January 2013 and was completed on August 2013. Mansell Construction Services are the principal contractor working for Project Genesis Limited.

Tesco's new £2.5m store is one of their new generation of eco-stores which cut's energy usage by recycling rainwater for toilets, using wind to provide ventilation and air conditioning, natural light and eco-friendly building materials. The store itself uses an innovative timber/steel hybrid frame and larch cladding.
